IFET Nagar, GANGARAMPALAYAM,
Villupuram District, 605 108.

Media Centre

The media centre has facilities to view video Programmes. The section is equipped with facilities to broadcast educational video Programmes to faculty members and students.

Audio-Visual Centre

English Department offers many learning techniques to improve student's English language skills. Computer-Assisted Language Learning strives to bridge the digital divide by giving all students equal access to technology-aided education. The Interactive skills attempt to sharpen certain skills of students through activities such as listening, speaking, reading and writing skills. The Audio-Visual Centre ensures that every student, irrespective of their background, is treated equally regarding the equipment and learning techniques they can access, making the entire class subject to the good outcomes of the faculty's hard work. The students are provided with accent neutralization training, a deeper understanding of phonetics, and other real-life skills like interview and presentation skills. The lessons are not limited to theoretical jargon; the students are encouraged to practically display and improve their skills by participating in group discussions and making presentations. The students' takeaways from these activities benefit them greatly regarding placements and competitive exams. The final objective is to help these students into confident orators, writers, and leaders. They can convert these skills into real-life skills, making them a lot more confident in the corporate fields, their work areas, interpersonal communication, and daily communication.

G. Mahendran
Dr.G. MAHENDRAN, B.E., M.Tech., P.D.
PRINCIPAL,
IFET College of Engineering,
(An Autonomous Institution)
IFET Nagar, GANGARAMPALAYAM,
Villupuram District, 605 108.

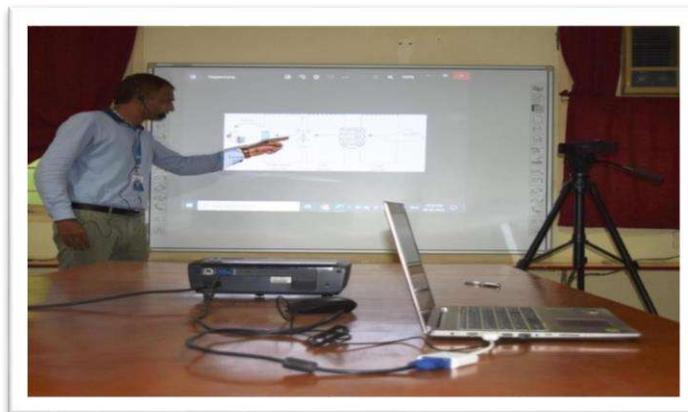

These activities aim to improve the students' fluency in the English language and ensure that they graduate with the confidence they require to communicate in this day and age.

Lecture Capturing System

Institute provides headsets and webcams for the faculty to capture the lectures. Recording lectures as videos and making them available for students to view the discussed content after the class.
