Events Conducted Related to Gender Equity

International Tolerance Day

The UNISEF estimated nearly 200 million girls and women worldwide have undergone some form of female genital mutilation (FGM). Despite being internationally recognized as a human rights violation, FGM persists for various reasons. No matter where or how it is performed, FGM causes extreme physical and psychological harm. In order to create awareness about this cruel practice “ZERO TOLERANCE TO FEMALE GENITAL MUTILATION” camp was carried out in the nearby villages of IFET, on the advent of International Tolerance Day.
